Labor Saving Soap !

DISSOLVE this piece in one gallon of water as warm as the hand will bear, in which put the articles you wish to wash ; let them remain 15 or 20 minutes in the sud, stir or dash them a few times, and the dirt will readily yield. By using this soap you save one half the labor and time than by using common soap. It will take out Grease, Tar, Pitch, Paint, Turpentine, &c., and will wash Silks and Satins. You will find full directions on every Bar.
